KSC Approved AntiVirus Software

Keene State College Policies and Procedures

Anti-virus for KSC Network for Students

Section Menu

Overview

Students connecting to the campus wireless network with a PC are required to have antivirus software installed on their PC.

Windows Based Computers

New Windows computers come with Windows Defender which does not require any additional anti-virus software. If you choose not to keep Windows Defender, you may use any anti-virus program on your computer. The only requirement is to have one installed.

MacIntosh Based Computers (optional)

Anti-virus is not required on Mac computers. However, it is always a good idea to have extra protection, but it is your option whether to install one or not.

If you need assistance, or have questions or comments, please contact the HelpDesk at 358-2532, email helpdesk@keene.edu or stop by our office on the 2nd floor of Elliot Hall.
